

TS-Series

Compact, Turn-key
Ozone Generators

The TS-Series ozone generators are turn-key ozone machines that include an integrated oxygen concentrator and air compressor. Just plug it in and a TS will produce compressed air, oxygen and ozone from ambient air.

WHY TS-SERIES?

The TS-Series is a user-friendly, plug-in ozone generator, producing up to 40 grams per hour of ozone. Its integrated oxygen concentrator and compressor uses ambient air to yield ozone pressures up to 15 psi. And with remote start capabilities, the TS Series allows hands-free disinfection for numerous applications. Available for rent or purchase.

About Ozone Solutions

Founded in 1997, Ozone Solutions has grown to become a worldwide leader in commercial ozone machines, ozone engineering, and ozone repair services that allow commercial and residential customers to address odor elimination and bacteria and pathogen disinfection.

Ozone Solutions designs and manufactures over 400 ozone-related products, including ozone generators, ozone monitors, and ozone injection systems. We also offer ozone machines for rent. Our line of ozone products serve national and international customers in industries such as healthcare, food & beverage, cooling tower, water treatment, and cannabis production. We provide

options from hand-held portable ozone monitors, to small commercial generators, to large-scale industrial ozone systems for both air and water disinfection.

Ozone Solutions provides custom tailored products for customers' specific applications. We offer engineering, integration consultation, and on-site support. Every Ozone Solutions system comes with features specifically designed to simplify installation and maintenance, while integrating seamlessly into your current process.

Better process. Better product. Better planet.
